Proactive	 <p>Most Effective</p> <p>Least Effective</p>	Level 1	Elimination - Can risks be removed, repaired, outsourced or otherwise eliminated?			
		Level 2	Substitution - Can risks be reduced through substituting the hazard or process with a safer alternative?			
			Isolation - Can risks be reduced through isolating the hazard from possible contact with workers or patrons?			
		Level 3	Engineering - Can risks be controlled through engineering means or structural / equipment modification?			
Administration - Can risks be controlled through training, supervision and / or signage?						
Reactive		Level 4	Personal Protective Equipment - Can risks be controlled through the use of personal protective equipment?			
			Emergency Response - Can risks be reduced through the provision of special / additional emergency response equipment and/or procedures? (measures in addition to standard First Aid kits, First Aid personnel, Fire Safety Installations, Fire and Evacuation Plans, training and drills)?
